## How to Generate and Integrate Google Key in RankReel

This tutorial have two parts, one explaining how to generate a Google Key through your own Google account and second part about how to implement that key into your RankReel app.

Part-I: How to generate a Google Key through your own Google account

Step1- Go to <a href="https://console.cloud.google.com/">https://console.cloud.google.com/</a>, login into your google account

**Step2-** Select a project from project list. Create a 'New Project' if in case you have no project in your dashboard.

**Step3-** After selecting your project, now you will be redirected to API Library. Else you can see Library option under 'API & Services' in left menu. Now, add **Custom Search API**- you have to search for '**Custom Search API**' in library and select '**Custom Search API**' from results.

And click on 'Enable'

**Step4-** Now, add **YouTube API-** you have to search for **'YouTube**' in library and select **'YouTube Data API** v3' from results.

And Click on 'Enable'

**Step5-** Now, add **Geocoding API**- you have to search for '**Geocoding API**' in library and select '**Geocoding API**' from results.
